Work Experience

(102 Months)

LinkedIn Corporation, Bengaluru		(19 Months)
Technical Program Manager		August '24-Present
- Spearheading a login re-architecture program to decouple monolithic services, improving scalability, performance, and long-term maintainability. - Led a Trust platform migration (200+ issues), transitioning services from Rest.li to gRPC and onboarding partner teams to the latest Foundations platform. - Designed and launched a VP-level Trust Ops dashboard tracking 100+ overdue and near-due tickets, enabling real-time alerts and faster escalations. - Drove a security health-check initiative to remediate critical vulnerabilities and improve compliance, increasing adoption of additional login methods by 10% within 6 months. - Partnered with engineering, product, and trust stakeholders to define KPIs, execution milestones, and transparent program-level reporting.		
Exxat Systems Pvt. Ltd., Bengaluru		(24 Months)
Program Manager		June '22-June '24
- Directed multiple product initiatives for a B2B SaaS EdTech platform used by 400+ institutions and 150K+ active users. - Owned and executed a roadmap focused on payment reconciliation and license visibility, reducing revenue leakage by 15%. - Spearheaded API-based migration tooling, cutting migration time by 50%, reducing errors by 80%, and lowering migration-related tickets by 95%. - Led third-party integrations that reduced student onboarding time to near real-time, significantly improving client satisfaction. - Implemented SAFe PI planning, defined product KPIs, and tracked outcomes to improve cross-functional alignment and delivery predictability. - Introduced Pendo analytics, improving roadmap decisions and increasing NPS by 11 points YoY.		
Eaton India Innovation Center, Bengaluru		(58 Months)
Program Manager		Sept '17-May '22
- Managed a portfolio of 3 New Product Development programs for Eaton's Electrical Division with a \$3.5M+ mature-year revenue impact. - Led cross-functional teams of 30+ members to deliver on-time product launches within a \$400K budget. - Owned P&L tracking and program governance to ensure cost, schedule, and quality adherence. - Built a custom VBA-based risk analysis tool, saving \$45K in third-party licensing costs and improving decision accuracy.		

Awards and Recognition

- Received two Outstanding Contribution Awards for work on A320 and MA700 aircraft programs.
- Winner of Best Prototype Award at Eaton Hackathon for an aircraft shimming solution.
