Career Summary:

A highly skilled Business Consultant with a passion for business strategy in the IT industry. With over 7.5+ years of experience in roles like software development, project management, change management and a strong domain presence in varied domains like Finance, Insurance and Automobile industries, I have developed a deep understanding of the software development life cycle, project management and agile methodologies. Additionally, I have a strong aptitude for problem solving and critical thinking, which I have honed through my experience with cross-functional teams and managing complex software project.

In my current role, I have also been responsible for collaborating with business stakeholders to understand the requirements and translate them into technical solutions. This experience has given me a unique perspective on the intersection between business and technology and has motivated me to pursue a career as a business consultant.

I am excited about the opportunity to leverage my technical expertise and business acumen to help organizations optimize their IT strategies and drive growth. I am a quick learner and am eager to expand my knowledge in business strategy.

Professional Work Experience: (In reverse chronological order)

Synechron Technologies Pvt. Ltd. (Client: Wells faro Bank), Bangalore

Technology Lead

Jul 2024 – present

Collaboration with other functional areas: To ensure that our work is aligned with broader business objectives, I would collaborate closely with other functional areas, such as product management, design, and project management. This would involve communicating technical constraints and opportunities, helping to establish project timelines, and ensuring that our technical work is aligned with overall business goals.

• Synechron Technologies Pvt. Ltd. (Client: Standard Chartered Bank), Bangalore

Sr. Associate Technology

Jul 2021 – Jul2024

As a tech lead in a cross-functional team, my role would involve leading the technical aspects of the team's work, while also collaborating closely with other functional areas to ensure that our efforts are aligned with broader business objectives. Specifically, my role would involve:

Leading technical strategy: As the tech lead, I would be responsible for developing and communicating a technical strategy that aligns with the team's objectives and business goals. This would involve working with stakeholders to identify and prioritize technical initiatives, and then collaborating with the team to ensure that we have the right resources and capabilities in place to execute on our plans.

Driving technical excellence: In addition to leading technical strategy, I would also be responsible for driving technical excellence across the team. This would involve promoting best practices, establishing technical standards, and ensuring that our work meets the highest quality standards.

Focus on specific areas: In terms of specific areas of focus, my role as a tech lead would involve working on a variety of technical initiatives, such as implementing BPMN tools, integrating APIs, and overseeing delivery of technical projects. In each of these areas, my focus would be on ensuring that we are leveraging the latest technologies and best practices, and that our work is aligned with broader business objectives.

Overall, my role as a tech lead in **Standard Chartered Bank** would involve driving technical excellence and collaboration across a cross-functional team, while also focusing on specific areas of technical expertise, such as BPMN tools, API connectivity, and delivery.

● **Manulife, Singapore**
Software Consultant

Jun 2018 - April 2020

As a member of a core agile team, my role involved working closely with business and higher management to develop world-class APIs and CRM-based solutions that helped customers have a fast turnaround time in the insurance industry on their queries. Specifically, my role included:

Agile development: As a member of an agile team, I was responsible for working collaboratively with other team members to develop high-quality software that met customer needs. This included participating in daily stand-ups, sprint planning, and retrospectives, as well as contributing to backlog refinement and task estimation.

API and CRM development: My role specifically focused on developing APIs and CRM-based solutions to improve customer query turnaround times. This involved designing and implementing scalable and reliable solutions, leveraging the latest technologies and best practices to ensure that the solutions were efficient and effective.

Collaboration with business and management: To ensure that our solutions were aligned with customer needs and business goals, I worked closely with business stakeholders and higher management to understand their requirements, gather feedback, and provide updates on progress. This included participating in regular meetings and presenting updates on the status of our development work.

Quality assurance: As a member of an agile team, I was also responsible for ensuring that our solutions met the highest quality standards. This involved participating in code reviews, conducting testing and debugging, and ensuring that our solutions were robust and secure.

Overall, my role involved working closely with other team members, business stakeholders, and higher management to develop world-class APIs and CRM-based solutions that improved customer query turnaround times. Through agile development practices, collaboration, and a focus on quality, we were able to deliver innovative solutions that met the needs of our customers and helped to drive business success.
